

CHRISTOPHER HOLLAND

SOFTWARE ENGINEER & AUTOMATION DEVELOPER

Maysville, KY 41056 | 606-375-5817 | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software engineer and senior CAD technician with 7+ years of professional experience in utility design and engineering workflows. Builds full-stack applications, internal tools, and production automation with a focus on maintainable code, practical problem solving, and measurable improvements. B.S. in Computer Science - Software Engineering, GPA 3.97.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, AutoLISP, Python, SQL, C++

Frontend: React, Next.js, HTML/CSS, Tailwind CSS, Responsive Design

Backend & Data: Node.js, REST APIs, PostgreSQL, Prisma, Supabase, Firebase

Automation & Tools: AutoCAD, DXF, GIS Data, Git/GitHub, Vercel, Agile Development, CI/CD

PROFESSIONAL EXPERIENCE

ENTRUST Solutions Group - Senior CAD Technician

Remote | Aug 2019 - Present

- Developed AutoLISP automation that reduced a multi-step drafting workflow from approximately three hours of manual work to roughly five minutes.
- Build AutoLISP tools for block placement, text generation, rotations, layer processing, and drawing cleanup, eliminating repetitive manual drafting steps.
- Translate GIS data, DXF files, markups, and field notes into construction drawings and as-builts while maintaining production standards and reducing rework.
- Collaborate with designers, engineers, and end users to identify workflow problems, test solutions, and maintain automation used in production; named Employee of the Month for accuracy, reliability, and automation contributions.

Aerotek - CAD Technician, Contract Assignment

Kentucky | Feb 2019 - Aug 2019

- Created and revised underground utility drawings in AutoCAD while meeting client CAD standards, quality-control requirements, and production deadlines.
- Transitioned from contract status into a permanent role based on performance and reliability.

SELECTED PROJECTS

AutoCAD Automation Suite

AutoLISP | AutoCAD | DXF | CAD Automation | Workflow Design

- Built a modular suite of AutoLISP tools for production utility-drafting workflows, including block placement, text creation, rotations, layer processing, roadway geometry handling, and duplicate cleanup.
- Reduced one multi-step workflow from approximately three hours of manual drafting to roughly five minutes while improving repeatability and consistency.

[GitHub](#)

DeckHaven - Full-Stack Web Application

Next.js | React | TypeScript | Tailwind CSS | Prisma | Supabase

- Built a responsive application for Magic: The Gathering players to manage decks and card collection data in one place.
- Implemented relational data modeling, reusable React components, responsive layouts, and architecture designed to support continued feature expansion.

EDUCATION

B.S. Computer Science - Software Engineering - Southern New Hampshire University | 2023-2025 | GPA 3.97 | Dean's List every semester

A.A. Mechanical Design - Maysville Community and Technical College | 2020 | GPA 4.00 | Dean's List

A.S. General Studies - Maysville Community and Technical College | 2012-2015 | GPA 3.50 | Dean's List
